

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1 – 82. (Cancelled)

83. (Currently Amended) A method for compression molding at least one polymer to provide a compression molded part with integrally formed graphics, comprising the steps of:

creating a molten billet of said at least one polymer;

situating a sheet or film containing graphics into a compression mold of a compression press, at least a portion of said sheet or film lying in a plane that is generally planar after it is situated in said compression mold;

loading placing said at least one polymer molten billet onto said sheet or film and into a said compression mold of a said compression press; ~~and~~

situating a sheet or film containing graphics into said compression mold of said compression press;

compressing said at least one polymer molten billet and said sheet or film to provide said a part having said sheet or film integrally molded therein and wherein said sheet or film comprises a graphics side facing away from said part; ~~and~~

performing said compression molding step using a said compression molding press mold having at least one area that is generally planar for receiving said at least a portion of said sheet or film.

84. (Previously Presented) The method as recited in claim 83 wherein said method comprises the step of:

shredding at least one contaminated polymer or a polymer matrix to provide said at least one polymer.

85. (Cancelled)

86. (Cancelled)

87. (Currently Amended) The method as recited in claim 83 wherein said method comprises the step of:

~~heating the processed molding materials~~ at least one molding material between a controlled temperature range of between 375 - 575 degrees Fahrenheit.

88 – 93. (Cancelled)

94. (Currently Amended) The method as recited in claim 83 wherein the part comprises a generally planar area corresponding to said at least one area of said compression mold that is generally planar.

95. (Currently Amended) The method as recited in claim 83 wherein said sheet or film comprises a ~~resin~~ polymeric or plastic sheet.
